The Traffic Cop's Handy Partner!

General Traffic's MANUAL HAND CONTROL is for those circumstances when a more precise approach to traffic control is necessary. Manual Controllers are utilized by police officers, school crossing guards or traffic engineers. A heavy-duty Momentary Switch mounted within the Bakelite Handle enables the user to control the traffic flow as each situation requires. The rugged and durable design will withstand rough handling, bad weather and other adverse conditions easing the task of manual traffic management.
