- Tang Width is 5/8"
- Choice of Powder-Coated Finish

Please specify powder-coated finish when ordering.

General Traffic Equipment Corp.'s Free Swinging Mast Arm Hanger is used to support a one-, two-, three-, or four-way traffic signal. In high winds, the design allows for a controlled swinging of the signal head. This model mounts a slipfitter to a 2 " mast arm end. It is locked on using a 3/8" thru bolt. A "Universal Link" is attached to the "Tang" with a clevis pin and a "Wire Entrance" fitting is attached to the " Universal Link". This completes the installation. The Free Swinging Mast Arm Hanger is cast from 356-T6 Aluminum Alloy for durability and strength.
